

ARCaDIA modular storage system for slides and paraffin blocks

Flexible Arrangement & Great Capability

ARCaDIA is the new storage system for slides and paraffin blocks made up of units, stackable on a floor base and easy-configurable that allow to create a tailored storage system according to the lab's changing needs and space.

The modular storage system ARCaDIA:

- With a storage capacity of 12,500 slides or 3,250 blocks for unit, is at the top of the storage systems line for Anatomic Pathology labs
- Made up of slide and block modular units that can be indifferently assembled in a wide range of combinations
- Due to the structure and drawers made of steel sheet, is a compact and robust storage system
- Supplied with guide rail system block, to prevent drawer tumbling
- Equipped with automatic closure system of the drawer
- On request, it is possible to provide ARCaDIA and their drawers with two-dimensional codes for their full integration with the lab tracking system.

Customized storage

By submitting to info@diapath.com the room plan where the storage system will be placed, we can study a tailored design to well-manage the lab space and benefit ARCaDIA modularity and storage capability.

- ARCaDIA for blocks: modular storage system, 5 levels (Cod. SDACA0001)
- ARCaDIA for slides: modular storage system, 3 levels (Cod. SDACA0002)
- ARCaDIA base (Cod. SDACA1005)
