

PRESS RELEASE

OCTOBER 2021

THE SECOND CYCLE OF WEBINARS DEDICATED TO ANATOMIC PATHOLOGY PROFESSIONALS HAS STARTED

At the beginning of 2021, Diapath set up its DIAPATH KNOWLEDGE ACADEMY with the aim of speaking directly to Lab Professionals, involving them in scientific topics and offering educational and informational speech to CREATE CULTURE through digital training. Given the success of the initiative, Diapath repeats the proposal with new contents.

It is December 2020, when Diapath employs an Anatomopathologist, Dr. Antonella Savio (MANAGING DIRECTOR, Histopathology Department The Royal Marsden Hospital, London) and appoints her to lead a series of educational webinars with tailor made intervention for LAB TECHNICIANS, ANATOMIC PATHOLOGY PROFESSIONALS AND ANATOMOPATHOLOGISTS needs.

This is an innovative approach for the world of diagnostic instrumentation companies: creating and spreading laboratory culture. An experiment highly appreciated by this niche audience: the first cycle of 5 webinars, from January to May 2021, was attended by 1090 Lab Professionals, from over 46 different countries around the world.

This is where "Share Your Experience" started, a spin-off of the first webinar cycle, an initiative launched last April 2021 and ended on July with the goal of creating a community of professionals who would share best practices and lab routines.

From this initiative, the most interesting contributions have been selected in preparation for the second cycle of webinars planned from November 2021, which will have as topic «EMPOWERING ANATOMIC PATHOLOGY LAB CULTURE», a new THINK TANK on issues that allow the immediate applicability of the contents in the daily routine.

MODERATOR of this second webinar cycle is confirmed doctor ANTONELLA SAVIO and webinars will involve speakers of international importance on broad issues.

11th November 2021: Lean management & Healthcare: practical applications in Anatomic Pathology

Dr Roberto Virgili
Technical Coordinator Anatomic Pathology
Policlinico Universitario Campus Bio-Medico of Rome

2nd December 2021: Digital Pathology and Telemedicine: Project Province of Bozen

Dr Guido Mazzoleni
Head Physician Anatomic and Histologic Pathology
Azienda ospedaliera of Bozen

20th January 2022

Part 1: Carrier-based Multi Tissue Blocks. A novel way of Multi-Tissue

Dr. Achim Jungluth
Director Developmental IHC
Ludwig Institute for Cancer Research
New York Branch at Memorial Sloan-Kettering Cancer

Part 2: Research and Innovation in Dermatopathology

Dr. Jeyroy Gabriel
Senior Specialist Biomedical Scientist
Dermatopathology Laboratory
St. John's Specialist Dermatology Laboratories | St Thomas' Hospital

Participation is free with compulsory registration on website:

<https://www.diapath.it/it/elenco-webinars>.

The webinar sessions will be held in English with Italian subtitles. There are two identical session per day: 10 AM (GMT +01) - 4 PM (GMT +01)
